# Fall / Winter 2023

- Ski Touring: Alpspitze Air 3L Jacket & Pant offer innovative and award-winning clothing concept for ascents and descents
- Texapore Ecosphere: Performance fabrics made from recycled and reused materials prioritize sustainability
- Bike Packing: A new standard in warmth and moisture management for riding in winter conditions

Jack Wolfskin is on a mission to get people outside doing what they love to do and inspires them to protect the environment and wild places. It's a concerted effort to rewild ourselves and rewild the planet.

The brand's Winter 2023/24 Outdoor Technical and Outdoor Lifestyle collections are a step forward in functionality and sustainability with multiple new designs that enable consumers to head outside in any weather and stay warm, dry and comfortable.

Sustainably derived materials and responsible manufacturing processes continue to take precedence in Jack Wolfksin's Winter 2023/24 collection. **Recycled materials** are used in 82 % of all apparel products and 79 % of products in the equipment sector. To further its advancements in sustainability and innovation, Jack Wolfskin **collaborated with textile pioneers** such as Schoeller, PrimaLoft<sup>®</sup> and Pertex<sup>®</sup> on apparel and **extended partnerships in its equipment business** with plastics engineering specialist OECHSLER and US-based 3D printing innovator Carbon.

Jack Wolfskin continues to work on its own technologies and material developments with the release of **Texatherm Pro, a new, sustainable insulation material**. The synthetic insulation feels like down with a comparable warmth-toweight ratio. It is made with 100% recycled polyester from

post-consumer waste. The technical synthetic fiber fill increases airflow and breathability to reduce overheating.

In 2023 Jack Wolfskin implemented **a new dyeing technology called NTX Cooltrans** that is expanded in the Winter 2023/24 apparel collections. The technology is based on a transfer printing process in which color is transferred from a medium (paper or film, which is recyclable) directly to the textile. As a result, much less water, energy and chemicals are used.

Furthermore, all down used by Jack Wolfskin is certified according to RDS (Responsible Down Standard).

For all **RDS certified products**, a complete certification of the entire down supply chain is guaranteed. The RDS takes a holistic view of animal welfare from the time the birds hatch from the egg to the time they are slaughtered. Among the criteria tested are the ban on live plucking and the ban on stuffing.

All new products are engineered in Germany with meticulous attention to design and performance and are proven in the wild by Jack Wolfskin's Discovery Team of professionals and enthusiasts.

### Skitouring

Jack Wolfskin expands its Alpspitze Series of pioneering apparel and packs specifically designed for ski touring with the ISPO award winning **Alpspitze Air 3L Jkt** and **Alpspitze Air Pants** with a hybrid, removable bib top. Expert knowledge and new ideas from an external agency (Jonathan & Fletcher) as well as competence and experience from internal employees and passionate ski tourers have been incorporated into the development and implemented with great attention to detail. The kit is built with Pertex<sup>®</sup> Shield Air fabric made with air permeable nanofibers to provide extremely breathable waterproof protection with minimal weight.

### Bikepacking

Designed for performance-oriented enthusiasts who continue to venture outside no matter the weather, the new collection features warmer pieces in reduced weights with Texapore Ecosphere, Pertex and Polartec fabrics and PrimaLoft insulations. Every product is detailed with extra cuts and features specific to riding to ensure all day comfort on the saddle. The new **Morobbia Alpha** products are a functional mix of light, extremely tear-resistant Pertex<sup>®</sup> Quantum Air and active Polartec<sup>®</sup> Alpha<sup>®</sup> insulation – twice as breathable and 60 % faster drying than typical insulation materials. This functional material is warm, regulates moisture and is wind- and water-repellent, elastic and robust.

### Hiking

Premium, highest- performing fabrics including waterproof, breathable Texapore Pro, Allied Feather + Down, HyperDRY down and PrimaLoft Black Rise recycled insulation highlight the new collection. The collection is headlined by the **Cyrox 2L Down Jacket** with paperweight stretch fabrics and 700 cu in grey duck down. The Texapore Ecosphere Material is made from recycled/ reused materials (components) and the membrane is made from cuttings generated during production and returned to the production cycle - a zero-waste concept.

The new women's **Tapeless 2.0 Jacket** is made with an exclusive and innovative seam sealing technique called Zero Tape technology that saves 20 meters of tape per jacket and produces particularly waterproof seams.

### Trekking

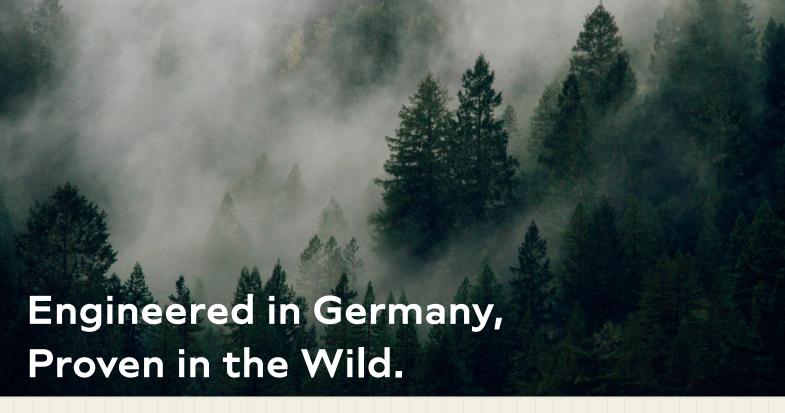

The Trekking Collection is a showcase of **collaboration between two industry leaders**. Jack Wolfskin pairs its Texapore Ecosphere waterproof breathable membrane made with recycled content with Schoeller's industry-leading 2- and 3-layer textiles to offer exclusive fabrics that work better in a wider range of outdoor conditions. The successful cooperation will be continued and expanded this season.

### **Bike Commuting**

Designed for urban discovery on two wheels, the bike commuting collection provides complete weather protection in modern styles made with the most advanced sustainable materials. The **Bike Commute Mono Jacket** stands out for its aesthetic but most importantly for its mono material construction. The main fabric is made from textile waste and when the zippers and reflective elements are removed, the entire jacket can be recycled.

### Wanderlust

With the new Wanderlust collection, Jack Wolfskin opens a new chapter and gives outdoor clothing a striking modern and functional impulse. Inspired by the trendy, fashionable influences, the smart collection manages **to close the gap between lifestyle products and highly technical sportoriented products**. The result is a unique and outstanding collection that combines new looks with performance materials and technical features.

# Jack Wolfskin Alpspitze Ski Touring Collection: Better Breathability and Protection for Ascents and Descents

## NEW JACKET AND PANT CONCEPT MADE WITH PERTEX SHIELD AIR DELIVER BEST IN AIR PERMEABILITY AND WEATHER PROTECTION IN LIGHTWEIGHT DESIGN

Ski touring demands extreme versatility in performance apparel to keep the body cool and dry on strenuous ascents and warm on the descents while always protecting the body from cold, wind and snow. Jack Wolfskin, introduces the Alpspitze Series of pioneering apparel and packs specifically designed for ski touring from moisture regulating base layers to functional fleece midlayers, insulated jackets and a three-layer shell jacket and bib.

Traditional garment concepts were completely rethought and redesigned in the development of the Alpspitze collection. Jack Wolfskin's leading designers collaborated with dedicated ski touring experts to dial in the fit, features and performance through rigorous field testing. The products are designed and developed for ease of use. Advanced technologies like an electrospinning membrane in the shell and bib provide maximum air permeability in an extra lightweight construction that makes it feel like you're not wearing a jacket yet it still delivers complete, reliable protection. Head to toe, all products fit together so skiers can focus on the terrain rather than their gear. The combined kit weighs 930 g.

## 01 Alpspitze Air 3L Jkt Men's

#### **Minimalism meets function**

- New, innovative clothing concept for Ski Touring combines external know-how with the experience of internal specialists – for the highest possible performance in alpine terrain.
- Extremely light, highly breathable (Airpermability >5L) and waterproof jacket with an electrospinning membrane.
- Newly developed kimono cut for minimal usage of seams and maximum freedom of movement.
- Chimney effect ventilation through expandable collar, additional wide side zip opening.
- Quick access to underlying layers, for example to the LVS-device.
- Helmet-compatible hood provides optimal field of vision.
- · Self-adjusting, elastic snow guard.

Material: Pertex<sup>®</sup> Shield Air (100 % Polyamide) Weight: 300 g (Size M)

### 04 Alpspitze Vest Men's

#### **Essential Core Warmth**

- Vest maintains core temperature to ensure comfort during an active day of ski touring.
- Delivers just the right amount of warmth and moisture movement capabilities to keep the body comfortable for hours on snow.
- An essential piece of the touring kit.
- Full-stretch for mobility.
- Chest pocket.
- Cellphone pocket.

Material: Texashield Softshell Lite 3L; 87% Polyester, 13% Elastane Weight: 280 g (Size M)

### 02 Alpspitze Ins Hybrid Men's

#### Warmth & Comfort in All Conditions

- Ideal companion jacket for adding extra warmth without overheating with full-stretch hybrid fleece construction.
- Full-zip jacket can be worn as a midlayer under the Alpspitze Air 3L Jkt or as an outer layer when conditions are suitable.
- Filling with PrimaLoft<sup>®</sup> Gold Active Vent: an extraordinary insulation fabric boasting an impressive warmth-to-weight ratio, very high breathability and extremely high elasticity. Moreover, Gold Active Vent consists of 80 % recycled fibres.
- Two raised hip pockets, inner pocket, fixed hood, articulated elbows.
- RECCO advanced rescue technology.

Material: Pertex<sup>®</sup> Quantum Air, 100 % Polyamide Weight: 370 g (Size M)

### 05 Seamless Wool L/S Men's

#### **Premium Merino Wool Performance**

- Soft, merino-blend next to skin layer that moves moisture away from the skin to help the body thermoregulate while staying dry and comfortable during all on snow activities.
- Seamless construction results in greater comfort, especially when worn with a pack.
- Super stretchy, seamless construction is soft next to skin.
- · Helps maintain ideal body temperatures.
- Stays warm in all conditions.

Material: Main Fabric: Wool Mixed Yarn; 55 % Wool (Merino), 43 % Polyamide, 2 % Elastane Weight: 160 g

## 03 Alpspitze Air Pants Men's

#### **Dynamic Duo**

- Perfectly coordinated and thought through down to the last detail: the adjustable bib vest offers optimal stow away possibilities and can be easily connected with the pants.
- The smart vest system functions without any problems and guarantees new flexibility and the best possible fit due to elastic toggles on the waistband which adjust themselves and optimally adapt to different upper body lengths.
- Additional protection in the back region through waterproof fabric.
- Zipped leg vents with access to three internal pockets.
- Functional combination of materials ensures best wearing comfort.
- Two chest pockets for LVS-device and mobile phone integrated into the bib.

Material: Pertex<sup>®</sup> Shield Air (100 % Polyamide) Texashield Core Stretch 88 % Polyamide; 12 % Elastane Weight: 630 g (Size M)

### 06 Alpspitze Pack 35

#### Flexible Ski Touring Backpack

- The Flexcontact carrying system adapts perfectly to the back, sits close and securely to the body and provides unrestricted freedom of movement.
- Wide stretch mesh hipbelt for additional support and optimal weight distribution.
- Quick access to safety equipment through separate front pocket, zipper operable with thick gloves.
- Poles, helmet and ice ax holders, diagonal ski attachment, all holders stowable for multifunctional use of backpack.
- The new material mix consists of a combination of lightweight and particularly abrasion-resistant materials.
- RECCO<sup>®</sup> advanced rescue technology.

Material: Cross Rip 280D RE ; 100 % Polyamide (Recycled); Front Chaintech 210D RE; 100 % Polyamide (Recycled) Weight: 1090 g; Volume: 35 l

## 01 Alpspitze Pro 3L Jkt Women's

#### Premium Women's Ski Touring Shell

- The finest ski touring jacket for women designed with Pertex<sup>®</sup> Shield Air fabrics.
- Fabric made with electric spinning nylon technology that expels excessive hot air away from the body.
- The waterproof breathable shell features two raised hip pockets, an inner stash pocket and a ski pass pocket.
- The fixed hood may be adjusted for field of vision and volume to accommodate a helmet.
- Pit zips are included for extra ventilation and an adjustable hem can be tightened to ensure snow doesn't sneak in.
- RECCO<sup>®</sup> advanced rescue technology.

Material: Pertex<sup>®</sup> Shield Air, 100 % Polyamide / Z-Liner: Pertex<sup>®</sup> Shield Air; 100 % Polyamide Weight: 400 g (Size S)

### 04 Seamless Wool L/S Women's

# Full-Stretch Merino Wool Warth and Comfort

- Soft, feminine merino-blend next to skin layer.
- Moves moisture away from the skin to help the body thermoregulate while staying dry and comfortable during all on snow activities.
- A deep half-zip allows for generous ventilation for greater comfort while ski touring.
- Super stretchy for mobility and comfort.
- · Stays warm in all snow conditions.
- Half-zip enables greater ventilation during ski ascents.

Material: Wool Mixed Yarn; 55 % Wool (Merino), 43 % Polyamide, 2 % Elastane Weight: 130 g (Size S)

## 02 Alpspitze Hoody Women's

#### **Full-stretch Comfort & Performance**

- A versatile softshell that can be worn as a midlayer or outerwear due to its full-stretch softshell construction.
- Made with Jack Wolfskin's exclusive Texashield Pro Softshell Lite fabrics.
- The hoody effortlessly moves with the body and moves excess heat and moisture away from the skin while providing complete weather protection.
- Softshell design comes with fixed hood, pit zips, a chest pocket and RECCO<sup>®</sup> advanced rescue technology.

Material: Texapore Pro Softshell Lite, 87 % Polyester, 13 % Elastane Weight: 400 g (Size S)

### 05 Alpspitze Pack 25

#### **Ski Touring Specific Pack**

- The front of the pack is constructed with a highly abrasion resistant Cordura Nylon material. This high-performance material withstands even the sharp edges of skis.
- In the side area, a recycled, lightweight Cross-Rip material is used. This creates the perfect material mix between lightweight and abrasion resistance.
- T-bar pullers to have easy and fast access to the safety compartment, also while wearing gloves.
- Pockets designed for shovels, probes, helmets, ice axes, food, water and gear.
- RECCO® advanced rescue technology.
- The Flexcontact carrying system adapts perfectly to the back, sits close and securely to the body and provides unrestricted freedom of movement.

Material: Cross Rip 280D RE ; 100 % Polyamide (Recycled); Front Chaintech 210D RE; 100 % Polyamide (Recycled) Weight: 880 g

## 03 Alpspitze Pro 3L Pants Women's

#### Almost Like You're Not Wearing Pants

- Versatile pants that provide exceptional weather protection while allowing ample air circulation for the greatest comfort whether ascending or descending.
- Fabric is made through an innovative electric spinning process that makes it the most air permeable performance fabric on snow.
- Light and non-binding, the pants feel nearly weightless but are durable and functional.
- Detailed with two leg pockets, full side zips and an adjustable waist.
- Microsuede warm lining is made with recycled and reused content.
- · Two leg pockets.
- Full side zips.
- · Adjustable waist.

Material: Pertex<sup>®</sup> Shield Air, 100 % Polyamide Weight: 435 g (Size 36)

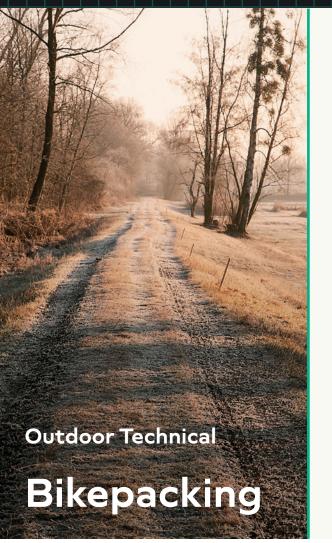

## 06 Alpspitze 3IN1 Glove

# Technically refined, warm and reliable companion for tours in deep snow

- A removable inner glove allows different wearing options. The hardshell glove can be worn individually or in combination with the fleece inner glove. The inner glove can also be worn solo in everyday life or leisure.
- The Pertex<sup>®</sup> Shield Air fabric offers an electric spinning nylon technology that expels excessive hot air away from the body.
- The Primaloft<sup>®</sup> Black Rise filling provides warm insulation and an optimal temperature and moisture regulation.
- Wrist Loop, Width Adjustment, Carabiner Hook.
- Silicone Print, Touchscreen Compatible (inner Glove) / Separate Stretch Fleece Glove Inside.

Material: Pertex<sup>®</sup> Shield Air, 100 % Polyamide Weight: 330 g (Size L)

Morobbia Alpha Ins Jkt Men's

# Bikepacking Collection Adds Warmth in Lighter Weights for Riding in All Seasons

## PERFECTLY EQUIPPED FOR MULTI-DAY BIKE TRAVEL

Bikepacking in the colder months offers endless days of empty roads and trails and the most contrasting light and scenery of the year. Jack Wolfskin's Winter 2023/24 Bikepacking collection is designed for performance-oriented enthusiasts who continue to venture outside no matter the weather. Warmer pieces in reduced weights highlight the men's and women's series of jackets, pants, midlayers, jerseys and accessories to comfort and protect from the weather in the most inclement conditions. Pertex<sup>®</sup> and Polartec<sup>®</sup> fabrics and Primaloft<sup>®</sup> insulations offer the best in breathability and moisture management while ensuring complete protection from wind, rain and cold. Every product is detailed with specific cuts and features specific to riding to ensure all day comfort on the saddle. The entire collection is equipped with reflectors providing high visibility. This clothing collection is complemented by the Bikepacking equipment.

## 01 Morobbia 3L Jkt Men's

# Fully equipped performance bikepacking shell

- High-end jacket protects with its waterproof, windproof and highly breathable Texapore Ecosphere membrane.
- Hard-wearing shell is made from recycled / reused materials.
- Multiple ventilation options.
- Tailored cut with drop tail and extended cuffs for greater protection in the riding position.
- 2 Chest Pockets.
- Fixed, adjustable hood, the hood fits under a helmet.
- · Pit Zips for ventilation.
- Adjustable Hem.
- · Reflective elements for enhanced visibility.

Material: Texapore Ecosphere RE Pro Stretch 3L: 100 % Polyester (Recycled) Weight: 430 g (Size M)

## 04 Morobbia FZ L/S Men's

# Full-zip cycling jersey for next to skin comfort and moisture management

- Soft and stretchy baselayer featured for cycling in cool climates.
- Texadri construction provides ample moisture movement for dry skin in all conditions.
- High performance material made from 100 % recycled polyester.
- Long sleeves extended to provide full protection in riding position.
- 3 back pockets.
- Key pocket.
- Reflective details.
- Elastic waistband.
- Offers long-lasting freshness thanks to Microban<sup>®</sup> technology.

Material: Texadri Reused / Recycled Tech Baselayer Anti Odor; 100 % Polyester (Recycled) Weight: 250 g (Size M)

## 02 Morobbia Alpha Ins Jkt Men's

# Lightweight, packable insulated shell made with most advanced fabrics for colder rides

- Pertex<sup>®</sup> Quantum Air material is engineered with increased air permeability to provide a balance between wind resistance and breathability.
- A durable water repellent (DWR) finish sheds light rain and snow to provide additional weather protection.
- Polartec<sup>®</sup> Alpha<sup>®</sup> insulation is twice as breathable and 60 % faster drying than usual insulation materials.
- Chest Pocket, 3 Back Pockets.
- · Reflective Details.
- Elastic Waistband.
- Articulated Elbows.

Material: Pertex<sup>®</sup> Quantum Air; 100 % Polyamide Weight: 255 g (Size M)

## 05 Morobbia Bar Roll

#### Smart and super durable luggage roll

- · Easy access handlebar storage.
- Thanks to the innovative FIDLOCK<sup>®</sup> WINCH magnetic closure, the pack sack with roll top can be quickly removed from the lightweight holder.
- With the sturdy TPU straps, the bag can be securely attached to any handlebar.
- The bag is waterproof and the robust material is mostly recycled.
- 15L capacity.
- bluesign<sup>®</sup> Product.

Material: Cross Rip 210D RE; 100 % Polyamide (Recycled) Weight: 570 g

## 03 Morobbia Alpha Pants Men's

#### Insulated cycling pants for mobility and weather protection

- A complement to the Morobbia Alpha Ins Jkt M, the Alpha pants provide warmth and weather protection.
- Pertex<sup>®</sup> Quantum Air material is engineered with increased air permability to provide a balance between wind resistance and breathability. A durable water repellent (DWR) finish sheds light rain and snow to provide additional weather protection.
- Polartec<sup>®</sup> Alpha<sup>®</sup> insulation is twice as breathable and 60 % faster drying than usual insulation materials and allowing greater breathability during high intensity activities.
- · 2 Hip Pockets.
- Reflective details for improved visibility.
- Elastic Waistband.
- Articulated Knees.

Material: Pertex<sup>®</sup> Quantum Air; 100 % Polyamide Weight: 220 g (Size M)

## 06 Woodland Shell Texapore Low M

# Multifunctional shoe with complete weather protection

- Waterproof and breathable Texapore Ecosphere Pro membrane keeps feet dry.
- Light and comfortable.
- Soft and lightweight hiking sole grips pedals.
- Well cushioned for extended comfort.Sure-grip tread.
- Material: Softshell Weight: 1030 g (Pair/Size 8)

## 01 Morobbia Jkt Women's

4

# Material mix for best performance and unrestricted freedom of movement

- Texashield Pro is 100 % windproof, highly water repellent and breathable and effectively protects against cold and wind.
- Material combination provides the important performance features in the places where it is needed.
- The 3-layer material is elastic, ensures freedom of movement and warms through the additional inner layer.
- Tailored cut with a droptail and extended sleeves for optimal weather protection in the riding position.
- Chest Pocket, 3 Back Pockets
- Reflective Details/Elastic Waistband

Material: Texashield Pro Knit 3L; 100 % Polyester Weight: 370 g (Size S)

#### 04 Morobbia Alpha Vest Women's

# Lightweight, packable insulated vest made with most advanced fabrics for colder rides

- Constructed with Pertex<sup>®</sup> Quantum Air waterproof breathable fabrics engineered with increased air permeability to provide a balance between wind resistance and breathability.
- Polartec<sup>®</sup> Alpha<sup>®</sup> insulation is twice as breathable and 60 % faster drying than usual insulation materials, and allowing greater breathability during high intensity activities.
  Feminine fit.
- Feminine III.
  Obset resket 2 De
- Chest pocket, 3 Back Pockets.
- Reflective details.Elastic Waistband.
- Material: Pertex<sup>®</sup> Quantum Air; 100 % Polyamide

#### Weight: 210 g (Size S)

## 02 Morobbia FZ Women's

#### Full stretch fleece for warmth and moisture management

- Soft, warm, comfortable fleece design maintains warmth.
- Moisture wicking to help the skin stay dry and comfortable.
- Fullzip for easy on and off and ventilation.
- · Highly breathable.
- Fast drying.
- Offers long-lasting freshness thanks to Microban<sup>®</sup> technology.
- 3 Back pockets.

Material: Texadri Stretch Fleece Anti Odour; 91 % Polyester, 9 % Elastane Weight: 285 g (Size S)

#### 03 Morobbia Tights Women's

3

#### Stretch fleece long tights for warmth in cold weather

- Texadri stretch fleece is smooth on the outside, textured on the inside.
- Very breathable.
- Fabrics wicks excess moisture and quickly dries.
- · Chamois pad with 6h riding endurance.
- · Reflective elements on sides.
- · Odour inhibiting and antibacterial.

Material: Texadri Stretch Fleece Anti Odour; 91 % Polyester Weight: 190 g (Size S)

#### 05 Morobbia Padded Shorts Women's

# Stretchy, extra padded shorts to ride the distance in comfort

- Highly elastic shorts feature a multi-layered, very stable padding.
- · Great comfort for long rides.
- Elastic waistband
- · Reflective details.

Material: Nylon Stretch; 80 % Polyamide Weight: 170 g (Size S)

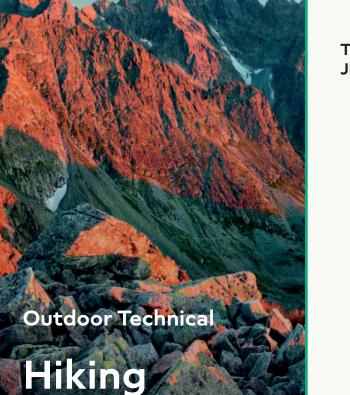

#### 06 Morobbia Light Glove

#### Longfinger cycling gloves for extended tours

- Texashield Pro Knit 3L is 100 % windproof, highly water repellent and breathable, effectively protecting against cold and wind.
- Offers long-lasting freshness thanks to Microban® technology.
- Silicon print is grippy and touchscreen compatible.
- Reflective details.

Material: Texashield Pro Knit 3L; 100 % Polyester Weight: 80 g/Pair

# All-In: Hiking Collection Features Pinnacle Technologies in Approachable Designs

COLLECTION UPGRADED WITH RECYCLED MATERIALS, TEXAPORE ECOSPHERE WEATHER PROTECTION, RDS DOWN AND PRIMALOFT INSULATION

Hiking is one of the most liberating activities for achieving mental and physical well-being and creating life experiences with friends and family away from the daily grind. It's the moments of discovery in wilderness where we find curiosity and are inspired to overcome limitations. These moments are the foundation of Jack Wolfskin's Winter 2023/24 Hiking collection of shells, insulated jackets, pants, shirts, footwear, accessories and more made with pinnacle fabrics and innovative features in approachable designs to make outdoor adventures more comfortable and enjoyable for all.

Premium, best performing fabrics from Texapore Pro stretch waterproof breathable materials, Allied Feather + Down HyperDRY down and PrimaLoft Black Rise recycled insulation highlight the new collection along with a first-ever women's Tapeless Jacket that alters the future of technical apparel construction.

Brand new for this winter season is Texatherm Pro insulation fibre newly developed by Jack Wolfskin. The technical synthetic fibre filling, made with 100 % recycled PES from post consumer waste, increases air permeability and breathability and reduces overheating. The sustainable synthetic insulation feels like down and is washable and easy to dry so it's easy to care for and maintain.

- 01 Cyrox 2L Down Jkt Men's The ultimate insulated and lightweight alpine jacket in a clean design packed with premium fabrics and insulation for comprehensive warmth and weather protection. Made with Papertouch and Texapore Ecosphere stretch fabrics and filled with RDS certified 700 cuin fill-power grey duck down. Material: Texapore Ecosphere Stretch Crinkle 2L; 100 % Polyamide; Weight: 885 g
- 02 Routeburn Pro Ins Jkt Men's A versatile insulator for all alpine and cold weather endeavors. Constructed with Texashield Pro outer fabrics and new Texatherm Pro insulation that is blown into the chambers, mimicking down a comfortable warmth-to-weight ratio.

Material: Texashield Pro Reused/Recycled Ripstop 20D; 100 % Polyester (Recycled); Weight: 500 g (Size M)

- 03 Glastal Winter Pants Men's These Lightweight, warm and durable pants are ideal for all fall and winter adventures. Cut with an athletic fit the pants are made with a durable stretch fabric that is highly wind and weather resistant. Material: Texashield Core Stretch; 91 % Polyamide; Weight: 400 g (Size 50)
- 04 Routeburn Pro Hybrid Men's An athletic hooded jacket to made go anywhere. Built with Texashield Pro fabrics and PrimaLoft Black Rise insulation with full-stretch fleece on the arms and shoulders to maximize mobility. Material: Texashield Pro Reused / Recycled Ripstop 20D; 100 % Polyester (Recycled); Weight: 390 g (Size M)
- 05 Terraquest Texapore Mid Men's A master of all weather in a rugged design, the midcut boot is an outdoor performer made with top materials, including a nubuck leather upper, Texapore Ecosphere Pro waterproof, breathable membrane, a premium OrthoLite insole and Vibram Ecostep outsole. Material: Texapore Ecosphere Pro (recycled); Weight: 1140g (Pair/Size 4)
- 06 Hiking Func Sock CL C A foot-pampering sock for hiking below the tree line. Ventilation zones, guick drying construction and anti odour treatment help keep the feet comfortable during long days on the trail. Material: 91 % Polyester, 5 % Polyamide, 4 % Elastane; Weight: 65 g (Pair/Size 41-43)

01 Tapeless 2.0 Jkt Women's Lightweight water- and windproof 3-layer jacket, with unique Zero Tape technology offering great breathability, exceptionally high wearing comfort and unmatched seam durability through a proprietary new seam processing technology.

Material: Texapore Core Fuse Stretch Ripstop 3L; 100 % Polyamide; Weight: 370 g (Size S)

- **02 Cyox 3L Jkt Women's** Lightweight Texapore Pro stretch fabrics provide exceptional protection from wind, rain and snow and grants the best freedom of movement for active tours. Equipped with helmet compatible hood with integrated RECCO advanced rescue technology and raised hip pockets for backpack compatibility. **Material:** Texapore Pro Stretch 3L; 100 % Polyamide; **Weight:** 375 g (Size S)
- **03 Alpgrat Pro Ins FZ Women's** All-new super technical hybrid jacket made with Pertex<sup>®</sup> Quantum Air for complete weather protection in the chest and shoulders. PrimaLoft Black Rise insulation made with recycled content provides the right amount of warmth.

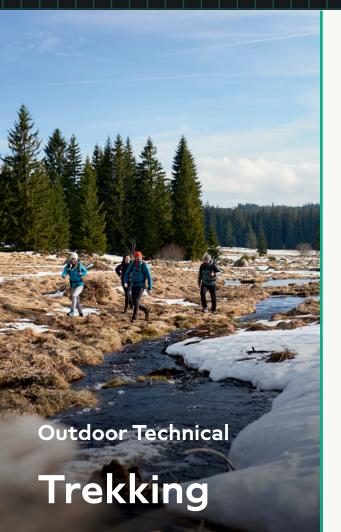

Material: Stretch Fleece Diamond Grid; 100% Polyester; Weight: 430 g (Size S)

- 04 Marienberg FZ Women's A lightweight, soft and luxurious fleece made with Lyocell-blend materials. The feminine full-zip fleece is stretchy and soft next to the skin.
  Material: Stretch Fleece Lyocell-Blend; 61 % Polyester (Recycled); Weight: 350 g (Size S)
- 05 Terraquest X Texapore Mid Women's A true hiking performance boot with modern style. Made with premium oiled nubuck leather upper, durable rubber toe protection, a Texapore Ecosphere Pro waterproof, breathable membrane and Vibram Ecostep outsole. Material: Premium oiled Nubuck leather; Weight: 950 g (Pair/Size 5)

**06 Athmos Shape 24** The lightweight and sporty hiking backpack provides ventilation and comfort with its snug carrying system. The innovative one-piece construction of the back system has the additional advantage of keeping production waste to an absolute minimum.

Material: Cross Rip 70D Re; 100 % Polyamide (Recycled); Weight: 770 g

# Jack Wolfskin

We Live to Discover

Denali 65+10 Men's

# Select Trekking Collection Highlights Texapore x Schoeller Fabric Innovation

# TOP INDUSTRY BRANDS COLLABORATE TO PROVIDE MORE DURABLE, PROTECTIVE AND SUSTAINABLE APPAREL DESIGNS

Trekking demands time to explore, to go deep beyond the confines of daily life. Jack Wolfskin's new trekking apparel, footwear, equipment and accessory collection is designed to last a lifetime of adventures with fabrics and innovative designs made to withstand the wear and tear of the trail while providing reliable weather protection and comfort in less than comfortable environments.

The collection is a showcase of collaboration between two industry leaders who put their minds together to create outstanding fabrics based on more than a century's worth of experience. Jack Wolfskin pairs its Texapore Ecosphere waterproof breathable membrane, which is made from cuttings generated during production and returned to the production cycle - a zero-waste concept, with Schoeller's industry-leading 2- and 3-layer textiles to offer exclusive fabrics that work better in a wider range of outdoor conditions.

Built on sustainability and durability, the trekking collection offers a select range of shells, pile fleeces, new softshell pants, long sleeve merino jerseys and a variety of footwear and packs to offer everything necessary for weeks and months on the trail.

**01 Kammweg Pile FZ Men's** Soft and warm, the full-zip jacket is made with high quality technical and reused/ recycled pile fleece. The reinforcement in shoulder area gives the fabric more durability in backpack pressured areas.

Material: Fleece Reused/Recycled Tech Sherpa; 100 % Polyester (Recycled); Weight: 610 g (Size M)

**02 Kammweg Pants Men's** The very comfortable Schoeller softshell fabric is a durable and abrasion resistant stretch fabrication with proven weather protection. Detailed with two hip pockets, two back pockets, a button front closure and belt loops.

Material: Texashield Core Schoeller®; 88 % Polyester (Recycled); Weight: 305 g (Size 50)

- **03 Merino Glove** A soft and lightweight merino wool, polyester blend glove that stays warm, even when damp and is naturally odour resistant. The material is comfortable to wear and versatile in use. **Material:** 50 % Wool, 50 % Polyester; **Weight:** 65 g (Size L)
- **04** Force Crest Texapore Mid Men's A robust, premium quality, all-around trekking boot for intensive day and multiday treks in the mountains. The Force Crest is made with a suede leather and textile upper featuring sustainable Texapore Ecosphere Pro advanced waterproof breathable protection and has a Vibram trekking sole. Material: Suede Leather; Weight: 1470 g (Pair/Size 8)

Bike

# Bike Commute Collection Combines Cycling and Recycling in Clean, Protective Designs

## ECOLOGICAL PERFORMANCE WEAR FOR BIKE COMMUTERS

Bike commuting as a rule leads to a more sustainable and healthier world. Jack Wolfskin takes cycling and recycling to a new, stylish level with its Winter 2023/24 collection of versatile shells, insulated jackets, vests, pants and accessories that ride the line between home, office and everything between. Jack Wolfskin equips bike commuters with lightweight, protective layers that may be worn throughout the day thanks to their clean, timeless design. Designed for urban discovery on two wheels, the bikewear provides complete weather protection in subdued styles made with the most advanced sustainable materials.

The Bike Commute Mono Jacket stands out for its aesthetic but most importantly for its mono material construction. The yarn for the upper material is made from textile waste and when the zippers and reflective elements are removed, the entire jacket may be recycled. Recycled and recyclable elements are found throughout the smartly tailored collection that makes a statement for anyone who prioritize cycling as a means of transportation and a lifestyle.

## 01 Bike Commute Mono Jkt Men's

# Monomaterial for recycling in the textile cycle

- The yarn for the upper material is made from textile waste. The membrane consists of post-industrial waste and the third layer of post-consumer waste, i.e. PET bottles.
- The light, very breathable, waterproof and windproof 3-layer hooded jacket is made from polyester. Used as a pure material it can be easily returned to the textile cycle.
   Even the adhesive consists of 80 % and the tape of 96 % recyclable polyester.
- Simply removable reflectors and zippers for uncomplicated recycling.
- Longer cut back and sleeves, spacious pocket, ventilation system in the back.
- Reflective details, fold-out reflectors on sleeves.

Urban Entdeckung

# Urban Entdeckung Collection Delivers High Performance Wrapped in Clean Design

# LONG CUTS, EXTRA PUFFY PIECES AND PREMIUM FABRICS GIVE EASY-GOING COLLECTION A SOPHISTICATED LOOK

Urban Entdeckung is an outerwear focused collection for everyday wear in contemporary designs with outdoor performance attributes. Clean, lightweight and advanced materials and Texapore Ecosphere membrane technology reflect the collection's modern approach. The membrane is made from cuttings generated during production and returned to the production cycle - a zero-waste concept. The outer fabric and lining are made from recycled PET bottles. In addition, various insulation materials are used such as Primaloft Black Rise and responsibly sourced, certified and extra warm down. The series of jackets, vests and accessories are designed for comfort and styled with sophisticated looks that command attention. Extra-long cuts to extra puffy pieces, the easy-going collection is modern and minimalistic and made to protect and comfort in cold, wet and windy conditions.

- 01 Koenigsbau Coat Men's A clean trenchcoat style with the best in technical weather protection, the Koenigsbau is a casual insulated coat with full-stretch comfort and warmth. Wanderlust

# Extra modern design lines merge with technical solutions that set new impulses

# NEW LOOK MEETS PRACTICAL AND TECHNICAL MATERIALS TO CREATE AN UNPRECEDENTED OUTDOOR CLOTHING IMPULSE WITH A SUSTAINABLE STATEMENT

With the new Wanderlust collection, Jack Wolfskin opens a new chapter and gives outdoor clothing a striking modern and functional impulse. Inspired by trendy, fashionable influences and sustainable design advancements, the small, smart collection manages to close the gap between lifestyle products and highly technical sporty products. The result is a unique and outstanding collection that combines new looks with performance-oriented materials and technical features. Chic quilted patterns create a trendy look and at the same time offer excellent insulation. Wind- and water-repellent outer materials are also used. The products are lightweight, made of comfortable materials and offer a sophisticated feature set. Texapore Ecosphere materials used in the collection represent a real breakthrough in weather protection clothing. The membrane is made from cuttings generated during production and returned to the production cycle - a zero-waste concept. The outer fabric and lining, on the other hand, are made from recycled PET bottles. The collection also uses Primaloft Black Rise insulation and RDS certified down. Likewise, many products are made with recycled / reused content.

# Lightweight, warm down insulated jacket for everyday wear

- Casual appeal but packed with technical outdoor features.
- Made with Texashield Pro Papertouch fabrics that are 100 % windproof, highly water repellent and breathable.

We Live to Discover

# Wild Child Comes out in New Kids Collection

# PERFORMANCE APPAREL WITH A HIT OF FUN WARMS AND COMFORTS KIDS THROUGH THE COLD MONTHS

Gleely 2L Ins Print Bib K

Kids are the most inspired discoverers in the world. Every day is a new adventure filled with awe. Jack Wolfskin's Wild Child Kids Collection captures the spirit of young seekers with fun, comfortable, high-performance apparel, footwear, gear and accessories to keep kids warm and dry as they exert their energy on everything in their path.

Tree climbing, to mud puddle jumping and hiking with the family, every Wild Child piece is made to withstand the rigors of being a kid in the natural environment. Warm, insulated printed jackets, bibs and vests made with Texapore Core waterproof breathable fabrics paired with cozy fleece jackets, pullovers and warm mittens and hats, provide a complete head-to-toe wardrobe for all-winter fun.

- **01** Gleely 2L Ins Print Bib K A warm, insulated bib with Texapore Core waterproof, breathable weather protection. Padded with Texatherm Core synthetic insulation that breathes and stays dry during hours in wet and cold conditions. Double fabric durability in knees and bottom. Material: Texapore Core Soft Taslan Décor 2L; 100 % Polyester; Weight: 350 g (Size 104)
- 02 Gleely 2L Ins Print Jkt K Fun prints disguise the performance attributes of this waterproof breathable winter jacket insulated with Texatherm synthetic insulation made from recycled and reused materials. Finished with 2 hip pockets, a fixed hood and reflective details.

Material: Texapore Core Soft Taslan Décor 2L; 100 % Polyester; Weight: 365 g (Size 104)

03 Gleely Ins Hooded Vest K Super chic vest that combines comfort with performance. The Gleely vest is made with Texashield Pro windproof and weather-resistant fabrics with Texatherm insulation. Equipped with 2 hip pockets, fixed hood and reflective details.

Material: Texashield Pro Softtouch Décor; 100 % Polyester; Weight: 230 g (Size 104)

- **04** Gleely Longsleeve K Dry skin is the key to keeping kids warm and dry when they're hard at play in the outdoors. The Gleely Longsleeve baselayer with a cute animal print, is constructed with soft Texadri fibres that wick moisture away from the body while retaining the right amount of heat. Material: Texadry Baselayer Heather; 100 % Polyester; Weight: 95 g (Size 104)
- **05** Night Hawk Beanie K Nearly half of body heat is lost through the head. The Night Hawk keeps kids warm and comfortable with its knit construction and microfleece lining. Reflective elements make backyard kid spotting with a flashlight easier in a snowy backyard. Material: Yarn; 100 % Acryl; Lining: Warmlining Microfleece, 100 % Polyester; Weight: 125 g

**06** Little Joe DBig on sustainability, the Little Joe day pack is ideal for first-time hiking trips for little ones. The wide opening makes it easy to load the 11 litre pack from the top. Features a main compartment, two mesh side pockets and a front pocket in sandwich box format. Material: Armatech Plus 600D RE; 100 % Polyester (Recycled); Weight: 300 g

07 Villi Hiker Texapore Mid K A real boot for first-time curious hikers, the Villi is constructed with a durable synthetic upper and Texapore Core waterproof breathable lining. Adjustable speed lacing and a big top Velcro strap make tying easy. Rubber outsole is extra grippy.

Material: Synthetic; Weight: 508 g (Pair/Size 31)
